## // EXPERIENCE

### Senior Frontend Engineer

[apr 2026 - aug 2026]

#### Kasta

##### HUB FOR SUPPLIERS / UKRAINE

/ \* A B2B supplier portal for Kasta marketplace (Next.js monorepo), enabling sellers to manage advertising campaigns, view sales analytics, and configure their accounts. \* /

- Developed and delivered a full-featured cashback campaign management module with analytics, change history, and an onboarding flow for new suppliers.
- Integrated SSO authentication with a Clojure backend via Next.js App Router SSR flow.
- Implemented a role-based access system with multi-account workspace support.
- Applied the DTO → Presenter adapter pattern to decouple API contracts from the UI layer.
- Configured Redux Toolkit for client-side state management in an SSR application.

### Senior React Engineer

[nov 2025 - feb 2026]

#### PwC / UniCredit

##### EMPLOYEE WORKLOAD PANEL / AUSTRIA

/ \* An MVP resource planning web application for UniCredit using React 19 and Java. The system visualized employee workload across projects based on Jira data, providing Gantt chart views, dashboards, and project details pages. \* /

- Implemented interactive Gantt chart to display employee workload.
- Integrated frontend with Java backend via REST API.
- Built dashboard with analytical charts for resource planning.
- Designed reusable wrapper components based on Ant Design.
- Collaborated in a cross-functional team of 4 engineers.

### Senior React Engineer

[nov 2024 - feb 2025]

#### Kozak Agency

##### APPLICATION FOR PRINTING HOUSE / USA

/ \* Users could order paper flyers, choose a design, and track orders. \* /

- Used the latest React, Material UI, styled components, react-hook-form.
- Worked in a team.
- Made the functionality for changing the used plan, the order table, and filters. Globally changed some material components.

## Senior React Engineer

[mar 2024 - sep 2024]

### M.A.R.E.<sup>™</sup> (Maritime Analysis & Risk Evaluation) - Contract

#### MAP FOR VESSELS / ITALY

*/ \* Next 14, TypeScript, API inside, Prisma and MongoDB for DB. For map use Mapbox. For notifications - Sendgrid. There are charts. Project is a world map, where users can follow their vessels, build safe routes, make different reports, and get notifications when something wrong with their fleet. \* /*

- Added new layers to the map and changed old ones.
- Making mobile version for some parts of application.
- Worked with reading, parsing xlsx files and saving data.
- Worked with charts, fixed bugs.

## Senior React Engineer

[jul 2021 - feb 2024]

### N-iX

#### RECORD CM / UK

*/ \* Developed a modern web application with the latest technologies used: microservices, Azure cloud, and API-based solution from scratch. The app is intended to become a single platform for clients to use it directly from the web, with modern UI design and functionalities e.g. execution trades or passive hedging services. \* /*

- Designed and successfully implemented reusable flexible components.
- Wrote code that is clean, easy to maintain, and tested.
- Conducted thorough code reviews to uphold quality standards.
- Stayed up-to-date with the latest React and web development trends.
- Implemented efficient testing frameworks to ensure reliability and efficiency.
